This project will clean and place an epoxy seal treatment on the underside of the US-189 structure over the Heber Valley Historic Railroad to protect it from damage caused by train steam and carbon emissions.

Work is expected to begin early next spring. The majority of these operations will take place underneath the structure. Some shoulder work may be necessary, but any impacts to traffic will be minor.

SR-32 Pavement Rehabilitation

SR-32, from US-40 to Milepost 7

Project Number: F-0032(39)0

PIN: 10042

Project Timeline:

Shane Marshall
UDOT Region 3 Director
801-227-8001
smarshall@utah.gov

To prolong the life of the roadway and provide a smoother ride for motorists, this project will repair and resurface SR-32 between US-40 to milepost 7.

Work will take place next spring, and will last for approximately three months. Motorists can expect intermittent one-way flagging operations with some delays.

Chip Seal Projects in Wasatch County

SR-113 and US-40

Project Number: F-R399(142)

PIN: 10077

Project Timeline:

Shane Marshall
UDOT Region 3 Director
801-227-8001
smarshall@utah.gov

To prolong the life of the roadway, this project will resurface the pavement at two locations in Wasatch County: SR-113, from Main Street in Midway to US-189, and US-40 from US-189 to Clegg Canyon.

Construction will begin next summer. Motorists can expect flagging operations/one lane of traffic in each direction for approximately three weeks.

US-40 Culvert Repair

US-40, south of Mayflower Interchange

Project Number: F-0040(113)9

PIN: 10932

Project Timeline:

Winter 2012/2013 to
Spring 2013

Commission-Approved Funding Amount:

\$ 1,365,378.08

Project Contacts:

Brian Phillips
Project Manager

smarshall@utah.gov

UDOT is currently investigating proper treatments to improve slope stability on both sides of the US-189, south of the “Dock of the Bay” boat launch area of Deer Creek State Park.

Because UDOT is still considering design options, this project does not yet have an exact scope or schedule.
